Offer validity	90 days

1. Introduction

Acme Marine Electronics is pleased to submit this technical offer for the navigation radar and ECDIS system of Hull 101. The offer is based on our standard AME-7000 bridge series.

2. Scope of Supply

Item	Description	Qty
1	X-band radar with 12 kW transceiver and 9 ft antenna	1
2	S-band radar with 30 kW transceiver and 12 ft antenna	1
3	Multifunction workstation with 19-inch display, 1600 x 1200 pixels	2
4	ECDIS software licence and chart management module	2
5	Bridge LAN switch (single, non-redundant)	1
6	UPS, 15 minutes back-up	1

3. Technical Particulars

3.1 Automatic tracking of up to 100 targets with AIS overlay. Radar performance is to IMO MSC.192(79); ECDIS to IMO MSC.232(82).

3.2 Interfaces to gyro, DGPS and AIS are included. The VDR and echo sounder interfaces are optional and are priced separately.

3.3 Antenna units are rated IP56, -25 C to +55 C. Below-deck units are rated 0 C to +50 C.

3.4 Type testing to IEC 60945 is complete. The marine type-approval certificate for the AME-7000 series is under process and will be furnished after award.

3.5 Built-in test identifies failures to board level. MTBF figures will be provided at the post-order stage.

4. Commercial and Support Terms (technical extract)

4.1 Warranty: twelve (12) months from date of commissioning or eighteen (18) months from despatch, whichever is earlier.

4.2 On-board spares: one (1) year, as per the attached list. FAT is included. Attendance at HAT and SAT is charged at standard service-engineer rates.

4.3 Training: two days at our works for up to 4 persons. On-board training is available on request.

4.4 Delivery: ten (10) to twelve (12) months from purchase order. Manuals in English, printed copy only.

4.5 Product support: spares availability for five (5) years after the end of series production.
